Performance Measurement Association of Australasia  
“Revolutionary Thought, Evolved Practices”  
2019 Conference Call for Papers - Queenstown, New Zealand

Conference Dates: 24 – 26 April 2019  
Venue: Queenstown, New Zealand  
Paper Submission Deadline: 12 January 2019  
Conference Website: [https://www.otago.ac.nz/pmaa-conference/index.html](https://www.otago.ac.nz/pmaa-conference/index.html)

The conference’s world-class keynote speakers will be:
- Dr Markus Arnold, Professor for Managerial Accounting and Director of the Institute for Accounting, University of Bern
- Dr David Brown, Professor of Management Accounting, University of Technology Sydney
- Dr Paul Healy, James R. Williston Professor of Business Administration, Harvard Business School
- Dr Gerhard Speckbacher, Professor for Strategic Management and Management Control, Institute for Strategic Management and Management Control, University of Vienna

The Performance Measurement Association of Australasia (PMAA) 2019 Conference, which will be PMAA’s fourth biennial conference, will be held in Queenstown, New Zealand in the Fall of 2019, or Spring if you are from “up north.” This global event is a must for scholars and practitioners alike. The conference will promote, question, challenge and critique theories and applications of performance measurement and management in all spheres of industry, commerce, government and society. The conference theme focuses on innovation in performance measurement and management thought and practice. CPD credit can be earned.

PMAA’s aim is to engage practitioners, academics and consultants in a joint dialogue on inter-disciplinary performance measurement and management issues evident in the private, public and not-for-profit sectors, and therefore the likely topics to feature at the conference are:
- Holistic Performance Management, showing the links and inter-dependencies
- Performance Measurement Frameworks
- Sustainability and Performance Measurement
- Design of Information Flows
- Designing and Implementing Performance Measurement and Management Systems
- Disciplinary/Functional Perspectives on Performance
- Managing Organizational Performance and Performance Measurement Systems (PMS)
- Measurement and Management of Intellectual Capital and Intangible Assets
- Measuring Dimensions of Performance, including Performance from Learning and Development Outlays
- Measuring Performance in Design and New Product Research & Development
- Organizational Structure/Responsibility Centre Design and Accountability
- Performance Alignment, e.g. KPIs, underlying business drivers
- Performance Measurement and Management, including Change
- Performance Measurement and Management in Different Organizational Contexts (e.g. industrial and commercial sectors, service sectors, governmental sectors, geographical locations, cultural spheres, etc.)
- Performance Reporting and Disclosure (e.g. Operating and Financial Review, Environmental Reporting, Corporate Social Responsibility)
- Strategic Position/Alignment
- Strategy and Information Systems
- Supply Chain Management

Further Details of Paper Submission, Participants, Location and Registration Costs

Submissions of papers, panel/workshop proposals, and PhD posters are invited. When submitting papers, please provide either an extended abstract of approximately 1,000 - 1,500 words or your full paper. Panel/workshop proposals should be supported by sufficient detail about the topic, length and featured speakers. PhD poster submissions should include either a camera-ready shot of your poster or an extended abstract of approximately 1,000 words describing the research. The deadline for all forms of submissions is 12 January 2019. Early submissions are encouraged, and these will be evaluated and a decision provided within two weeks of their receipt. A monetary prize of NZ$500 will be offered for the best PhD poster.

Conference attendees are expected to come from all around the world, including Australia, East Asia, South Asia, North America and the European Union. We would especially welcome guests from Central and South America, Africa and the rest of Asia. Similar to past conferences, we expect a good turnout of participants from both industry and academia.

The conference venue will be Queenstown, known as the adventure capital of New Zealand. Nestled on the shores of Lake Wakatipu’s pristine waters and with the surrounding Southern Alps in the background, Queenstown is renowned for its natural beauty and many tourist attractions. Conference attendees are likely to want to spend a few days on either side of the conference exploring the town and its environs.
